SUMMARY

I'm a Junior QA Engineer who wants to improve both hard and soft skills on a day-to-day basis and gain real experience in software testing. I have knowledge in foreign languages that can help me in localization testing. I'm looking for a family-like environment where I can make the world a better place to live in by improving a software quality.

Skills:

- Experience of working with some technologies and tools: SQL, Postman, Apache JMeter, Chrome DevTools, Git, Jira;
- Understanding of client-server architecture;
- Good knowledge of software testing theory;
- Writing test documentation (checklists, test cases, bug reports, test result reports);
- Understanding of SDLC methodology: Agile (Scrum, Kanban);
- Attention to detail;
- Problem-solving skills;
- Quick learner;

Trainings and certificates:

- Software Testing course by **Vadim Ksendzov** (in progress);
- Technical Support Fundamentals on **coursera.org** (July 2020);
- Software Testing Introduction training by **EPAM Systems**, 2019;
- Manual Software Testing course by **Innovative Knowledge LLC** (<https://myit.by/>), 2019;

Languages:

- Belarusian, Russian – native
- English – B1+
- Turkish – A2
- Spanish – A1 (Certificate No. 116 issued by Brest State University named after A.S. Pushkin dated 27 May 2016)

WORK EXPERIENCE

2010 2019 - English and Turkish Interpreter, **Dialect Ltd.**, inter-text.info/

- translation of various types of documents (working languages: Belarusian, Russian, English, Turkish);
- proofreading and mistakes correction;
- consecutive interpretation;
- everyday interaction with both customers and managers;

EDUCATION

Cross-cultural and communication specialist, English and Turkish interpreter, **MSLU** (2004-2009)
